

DEAR EDITORS,

April 9, 2020

I would like to suggest that the Coop consider instituting a system where all members are randomly assigned two two-hour time periods for shopping each month for the duration of the current health crisis. This could solve the problem of people waiting in line for hours as the Coop does its best to keep people from infecting each other. There should be an appeals process for people who have verifiable reasons for being unable to shop during their randomly provided windows.
