

TIME FOR A VACCINE MANDATE AT THE COOP

October 5, 2021

DEAR *LINEWAITERS' GAZETTE* EDITORS,

It is time for the Coop to implement a vaccine mandate for its members. I understand that not everyone is able to get a vaccine, including those with autoimmune disorders, those receiving chemotherapy, etc. However, the vast majority of people, including the vast majority of Coop members, do not fall into these categories. For those of us who are able, the time to hesitate is through.

It was heartening to see, during the pandemic, how Coop members eagerly adopted public health best practices: social distancing, masking, limiting the number of members in the Coop at a time, etc. The Coop did a much better job than most other institutions at keeping its members safe and healthy.

Now the Coop must take the next step: require members, who are able to receive a vaccine, to be vaccinated if they intend to remain members.

While I understand indoor masking will be the norm for some time, if we are ever to return to a world without masks, we must be vaccinated. It is not fair that the majority of members must continue wearing masks on their shifts indefinitely because a few holdouts refuse to get vaccinated. Life must eventually return to normal. The best way to accelerate that process is to require all Coop members who are able to get vaccinated to do so.

Sincerely,

Taylor Wofford
